Home Visit Assessment:

Mr Sample Person

12 Example Way, Testville Heights 3999

Thank you for referring Sam for physiotherapy treatment at home.

Home assessment	Sam lives alone in a double storey house with level pathways to all rooms. There are 3 steps between the living area and the shower. There are no modifications to the home. There is a rail at the back door for access.
Steps	There are 2 steps at the front entrance and a staircase to the second level where the bedroom is. Sam climbs them twice a day, morning and night. We reviewed gait and use of the rail.
Mobility and transfers	Sam uses a single point stick to walk around the house and uses it out in the community. Sam reports no falls in the past year.

Please contact the clinic with any questions about this report.
